EXPLANATORY NOTES

Birth, death and marriage-rates are calculated on the estimated population at 31st December, 1962.

References to average or average rate are to the average rates for the corresponding quarters of the five years 1958-1962.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth-rate is below that for the first quarter of 1962 but is above the average.

The stillbirth-rate is below the average.

The marriage-rate is below that for the corresponding quarter in 1962 and also below the average.

The death-rate is above that for the first quarter of 1962 and also above the average.

The infant mortality rate is below the average.

Live Births. 25,880 births were registered in the quarter under review, 607 fewer than in the corresponding quarter of 1962. The rate per 1,000 population is 20·2, being 0·5 below that in the first quarter of 1962 but 0·2 above the average.

The proportion of illegitimate births, 5·0 per cent., is 0·5 above that for the first quarter of 1962 and 0·7 above the average.

Of the 25,880 births 13,403 were of male children and 12,477 of female children, being 1,074 male births per 1,000 females. Births registered in January numbered 8,850, in February 7,971 and in March 9,059, the equivalent birth-rates being 20·0, 20·0 and 20·5 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 528, and is equivalent to a rate of 20 per 1,000 total births (including stillbirths). The rate is the same as that for the corresponding quarter in 1962, but 2 below the average.

Marriages. The number of marriages registered, 9,194, is 819 fewer than for the first quarter of 1962. The rate per 1,000 population is 7·2. It is 0·6 below that for the corresponding quarter of 1962 and 0·8 below the average.

Of the 9,194 marriages, 2,058 were civil marriages contracted in Registrars' Offices, and 7,136 were solemnized by a Minister of religion. In the corresponding quarter of 1962 civil marriages numbered 2,149 and those with a religious ceremony 7,864.

Marriages registered in January numbered 1,715, in February 2,506 and in March 4,973, the equivalent marriage-rates being 3·9, 6·3 and 11·3 respectively.

Deaths. Deaths registered during the quarter numbered 20,707, and equal a death-rate of 16·1 per 1,000 population. They are 2,191 more than were registered in the corresponding quarter of 1962. The rate is 1·6 more than in that quarter and 1·4 above the average.

Deaths registered in January numbered 6,984, in February 6,599 and in March 7,124, the equivalent death-rates being 15·8, 16·5 and 16·1 respectively.

Infant Mortality. Deaths of children under one year numbered 762 and are equivalent to an infant mortality rate of 29 per 1,000 registered live births. This rate is one below that for the corresponding quarter of 1962, and 2 below the average. Among legitimate children the mortality was 29 per 1,000 births and among illegitimate children 42.

The neonatal mortality rate (deaths of infants under 28 days) was 19 per 1,000 live births, and is one above that for the corresponding quarter of 1962.

Perinatal deaths (stillbirths and infants under 7 days) numbered 931, and are equivalent to a rate of 35 per 1,000 total births (including stillbirths). This rate is one below that for the first quarter of 1962.

Sickness Benefit. The number of new claims to sickness benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 26th March, 1963, was 372,689, of which 99,370 were in Glasgow, 30,711 in Edinburgh, 15,516 in Dundee and 13,929 in Aberdeen.

80	1,961	5·15	3,571	5·85
85	783	4·12	1,787	4·20

This abridged life table is constructed from the estimated population in 1960, 1961 and 1962, and the total deaths registered in those years.

The column head lx shows the numbers who would survive to exact age x out of 10,000 born who were subject throughout their lives to the death probabilities indicated by the 1960-1962 death records. Column $\overset{\circ}{e}x$ is the "expectation of life", that is the average future lifetime which would be lived by a person exactly x, if likewise subject to these death probabilities.

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

JANUARY 1963

Mean temperature was 31·9°F., 5·6°F. below average. Warmest period was around 24th-27th with absolute maximum temperature 49°F. at Crossmyloof (Glasgow), Paisley and at Younger Botanic Garden (Argyll) on 26th. Highest minimum air temperature was 44°F. at Sule Skerry overnight 26th/27th. The lowest minimum air temperature was −8°F. (40 degrees of frost) at Braemar overnight 17th/18th. At Braemar also, the lowest maximum temperature of 11°F. was reported on 12th. West Linton with −6°F. overnight 12th/13th recorded the lowest ground temperature. These figures represent for the month of January (*a*) the lowest mean temperature with two exceptions (1940 and 1941) since 1895. (*b*) The lowest absolute maximum temperature with two exceptions (1941 and 1895) since 1856. (*c*) The lowest absolute mimimum air temperature since 1910.

Sunshine totals were above average in the West and particularly so in the North-west. Stornoway had its sunniest January since 1881. Duntuilm (Skye) since at least 1934 and Onich since at least 1929. Auchincruive with 86 hours was the sunniest place. The Eastern side of the country fared less favourably with deficits in most places.

Precipitation, mainly in the form of snow, was below average except for some places in extreme South-east. Amounts recorded in the West were generally less than 20 per cent and in some places less than 10 per cent. Stornoway recorded its driest January since 1871, Kilmarnock since 1902, West Linton since 1908.

Gales occurred on 11 days, fog on 16 days but thunder was reported only on 1 day. Snow fell at one place or another on 29 days and was reported as lying on every morning. Strong easterly winds at time caused severe drifting especially in the Border area and in the Highlands which resulted in many villages and remote homesteads becoming cut off. Aurora was reported on 10 nights.

FEBRUARY 1963

The mean temperature was 32·1°F., 6·4°F. below average. This is the lowest mean temperature for any February, with the exception of 1947, since 1895. The warmest days occurred during the last week of the month and the highest temperature reported was 53°F. at Fort William on the 28th. The highest night minimum temperature was 40°F. recorded at Lerwick (1st), Hamnavoe (24th and 27th), Sule Skerry (27th and 28th), Cape Wrath (26th) and Stornoway (26th). The coldest days reported were mainly during the 2nd-6th or around 24th but cold nights also occurred on 13th, 17th-20th and 26th. On the 13th the air minimum temperature fell to −2°F. (34 degrees of frost) at Braemar and the same temperature was reported at Lauder on the 26th, while on the 2nd the temperature never rose above 25°F. (7 degrees of air frost) at any time at Leadhills. On the ground the minimum temperature reported was −5°F. at Glenshee Lodge but many thermometers on the ground were snow covered at times.

Sunshine amounts were above average in all districts and at Auchincruive and Kilmarnock amounts measured were over 50 hours in excess of average. Prestwick was the sunniest place with 127 hours closely followed by Auchincruive with 126 hours.

Precipitation was mostly in the form of snow, with some sleet at times. In East and South-east districts amounts were above average, especially in hilly areas, but in many parts of the West amounts were less than 25 per cent and in some places less than 10 per cent of the normal February totals. Many places reported their driest February for many years and noteworthy amongst these were Stornoway (since 1876), Inverness (since at least 1890), Achnashellach (since 1911), Lerwick (since 1912).

Gales occurred on 13 days, fog on 24 days and aurora was seen on 8 nights. Thunder was not heard at any station but snow or sleet was reported on 24 days and snow was observed lying at one station or another on every morning. With gale force winds causing severe drifting at times, roads were blocked and villages and remote places isolated.

MARCH 1963

The mean temperature was 41·9°F., 0·3°F. above average. The warmest periods were around 6th-8th and 14th-23rd with the absolute maximum temperatures 58°F. recorded at Paisley and Helensburgh on 20th, and the highest night minimum temperature 48°F. at Fort Augustus overnight 14th/15th. It was coldest during the first few days with Braemar reporting the lowest air temperature of 4°F. (28 degrees of frost) on 2nd. On thermometers exposed over grass the lowest temperature measured was 0°F. (32 degrees of frost) at Whitehillocks on 4th. At Blairgowrie temperature never exceeded 34°F. at any time on the 3rd.

Sunshine totals were below average in Eastern districts from Fife to Aberdeenshire and there were excesses in most other places. It was sunniest at Nairn where 142 hours of sunshine were recorded. This amount is 29 hours in excess of average.

Rainfall amounts were below average in districts near the Moray Firth and in extreme South-east but elsewhere moderate to large excesses were reported, with extensive areas showing amounts more than twice, and in a few places three times the usual March quota. It was the wettest March since 1921 over many parts of Scotland. Dumfries had its highest monthly total for any March since at least 1911, and Perth its highest since 1913. Only small amounts of rain were reported generally during the 1st-3rd, 11-12th and 20th-22nd. The 24th was a particularly wet day generally and on the 14th very heavy falls occurred at places in the West. Kingairloch measured 3·07 inches and Afton Reservoir 2·57 inches on that date.

Gales occurred on 20 days, fog on 23 days and aurora was seen on 4 nights. Thunder was reported on 7 days and snow or sleet on 22 days with snow reported lying at the morning observation on 13 days.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

X	Cases of Infectious Diseases notified to the Scottish Home and Health Department in the 13 weeks ended 29th June, 1963	24
	Local Government Electors, 1963	25
	Meteorological Notes for the quarter supplied by Meteorological Office, Edinburgh	26
	Abstract of Meteorological observations made at eleven of the Principal Towns during the quarter	27

EXPLANATORY NOTES

Birth-, death-, and marriage-rates are calculated on the estimated population at 31st December, 1962.

References to average or average rate are to the average rates for the corresponding quarters of the five years 1958-1962.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth-rate is below that for the second quarter of 1962, but is above the average.

The stillbirth-rate is below the average.

The marriage-rate is above that for the corresponding quarter of 1962, but is below the average.

The death-rate is below that for the second quarter of 1962, but is a little above the average.

The infant mortality rate is the lowest for any second quarter.

Live Births. 26,417 births were registered in the quarter under review, 500 fewer than in the corresponding quarter of 1962. The rate of 1,000 population is 20·4, being 0·4 below that in the second quarter of 1962, but 0·2 above the average.

The proportion of illegitimate births, 5·1 per cent., is 0·1 above that for the second quarter of 1962 and 0·5 above the average.

Of the 26,417 births 13,650 were of male children and 12,767 of female children, being 1,069 male births per 1,000 females. Births registered in April numbered 8,895, in May 9,089 and in June 8,433, the equivalent birth-rates being 20·8, 20·6 and 19·7 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 493 and is equivalent to a rate of 18 per 1,000 total births (including stillbirths). The rate is one below that for the corresponding quarter of 1962 and 3 below the average.

Marriages. The number of marriages registered, 8,136, is 45 more than in the second quarter of 1962. The rate per 1,000 population is 6·3. It is 0·1 above that for the corresponding quarter of 1962 but 0·1 below the average.

Of the 8,136 marriages, 1,741 were civil marriages contracted in Registrars' Offices, and 6,395 were solemnised by a Minister of Religion. In the corresponding quarter of 1962, civil marriages numbered 1,684 and those with a religious ceremony, 6,407.

Marriages registered in April numbered 3,708, in May 1,259 and in June 3,169, the equivalent marriage-rates being 8·7, 2·8 and 7·4 respectively.

Deaths. Deaths registered during the quarter numbered 15,153 and equal a death-rate of 11·7 per 1,000 population. They are 338 fewer than were registered in the corresponding quarter of 1962. The rate is 0·3 below the rate in that quarter, but 0·1 above the average.

Deaths registered in April numbered 5,629, in May 5,046 and in June 4,478, the equivalent death-rates being 13·2, 11·4 and 10·5 respectively.

Infant Mortality. Deaths of children under one year numbered 625, and are equivalent to an infant mortality rate of 24 per 1,000 registered live births. This rate is 2 below that for the corresponding quarter of 1962 and 2 below the average. Among legitimate children the mortality was 23 per 1,000 births and among illegitimate children 37.

The neonatal mortality rate (deaths of infants under 28 days) was 16 per 1,000 live births, and is 3 below that for the corresponding quarter of 1962.

Perinatal deaths (stillbirths and infants under 7 days) numbered 869, and are equivalent to a rate of 32 per 1,000 total births (including stillbirths). This rate is 3 below that for the second quarter of 1962.

Sickness Benefit. The number of new claims to sickness benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 25th June, 1963, was 225,469 of which 60,270 were in Glasgow, 17,531 in Edinburgh, 9,348 in Dundee and 8,273 in Aberdeen.

LOCAL GOVERNMENT ELECTORS, 1963

This table has been compiled from returns furnished by Town Clerks and County Clerks, and shows the aggregate number of local government electors for Scotland, counties of cities, large and small burghs, landward areas and districts (district council areas; where elections are held every 3 years). The figures indicate to what extent seats on Councils were contested and the percentage of the electorate who voted at the local elections held in May this year. For comparison percentages are also shown for the years 1960, 1961 and 1962.

A detailed analysis of the local government election results is published each year in the Registrar-General's Annual Report.

Local Government Electors and Analysis of Local Elections on the 1963 Register and Percentage of Electorate who voted.

	Local Government Electors	Analysis of Local Elections							
		No. of Councillors returned unopposed	Contested Elections						
			No. of Councillors returned	Electorate in contested Electoral Divisions or Wards	No. of ballot papers in ballot boxes	1963	1962	1961	1960
						Percentage of Electorate voting			
SCOTLAND	3,394,156	314	587	2,131,694	881,373	41·3	42·4	45·2	39·8
Counties of Cities	1,242,968	1	84	1,233,414	476,547	38·6	38·9	40·9	37·0
Large Burghs	566,766	25	115	495,889	202,893	40·9	45·8	43·8	40·8
Small Burghs	621,442	288	388	402,391	201,933	50·2	50·5	50·1	40·5
Landward Areas	962,980	—	—	—	—	—	—	57·8	—
Districts of County	957,795	—	—	—	—	—	—	54·6	—

There were contests in all the cities (4) and large burghs (20), and in 102 of the 175 small burghs.

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

APRIL 1963

The mean temperature was 45·6°F., 0·2°F. below average. It was warmest around the 23rd to 28th and the highest temperature reported was 67°F., at both Gordon Castle and Huntly on 26th. The highest night minimum temperature was 51°F. in the Moray Firth area on 27th, and in the Edinburgh area on 28th. The coldest period was from the 4th to 13th and the lowest air temperature recorded was 19°F. (13 degrees of frost) at Cannich on 8th and Glenmore Lodge on 9th. At Earl's Hill, in Stirlingshire, temperature never rose above 34°F. at any time on the 12th. On the ground, the lowest temperature recorded, on thermometers over grass, was 9°F. (23 degrees of frost) at Cannich on 8th, and Nairn on 9th.

Sunshine amounts were about average in the extreme North-West and over the extreme North of the mainland, but there were deficits elsewhere. At Stornoway the total of 182 hours was 40 hours more than average and at Strathy the 157 hours reported was 32 hours in excess of the normal April amount. In contrast, stations in the Edinburgh area reported deficits of over 30 hours. Benbecula was the sunniest place with a total of 190 hours.

With the exception of areas north of a line from Aberdeen to Tobermory, there was an excess of rainfall. The driest periods generally, were around 6th to 9th and 23rd to 25th and the wettest days were mainly the 12th, 13th, 17th and 21st. Amongst the heaviest daily falls were 2·09 inches at Glenbranter, 1·69 inches at Strathyre, 1·34 inches at Inveraray and 1·32 inches at Balquhidder, all on 21st and 1·35 inches at Gobersnuisgach (Sutherland) on 13th.

Gales occurred on 11 days, fog on 16 days, aurora was seen on 10 nights and thunder heard on 5 days. Snow or sleet was recorded here and there on 12 days and snow was reported as lying on two mornings. The heaviest falls of snow occurred around the 12th or 13th (the Easter period) and some roads were blocked.

MAY 1963

The mean temperature of 49·1°F. was 1·6°F. below average. The warmest period occurred during the last week and the highest temperature for the month was 76°F., reported from Prestwick and Barr on the 31st. The highest night minimum temperature was 52°F. overnight 30th/31st at Threave, Bargrennan and St. Kilda. It was particularly cold during the first week and around the 23rd and 24th. The lowest air temperature recorded was 26°F. (6 degrees of frost) at Glenmore on 24th and on the ground the thermometer reading at Glenshee fell to 21°F. (11 degrees of frost) on 23rd.

Sunshine amounts were above average in the South, South-west and East, but below average in some parts of the West Coast and in places in the North-east. Dumfries had a total of 227 hours which was 39 hours above average, while Oban (168 hours) showed a deficit of 29 hours. West Freugh was the sunniest station with 235 hours.

Rainfall amounts were below average on eastern side of the country and there was an excess elsewhere. Some parts of south and west Inverness-shire had two to three times their May average. The driest period was 26th to 31st, and 7th and 12th were wet days in most places. At Kingairloch 1·73 inches was recorded on 12th and on 7th Achdalieu had 1·57 inches and Kinlochourn 1·56 inches.

Gales occurred on 15 days, fog on 11 days, aurora was seen on 4 nights and thunder heard on 10 days. Snow or sleet showers were reported from one place or another on 18 days but no report of snow lying on the ground in any morning was received.

JUNE 1963

The mean temperature (56·3°F.) was 0·4°F. above average. Easterly winds and haar caused deficient or near average mean temperatures on the East Coast but elsewhere they were mainly above the seasonal average. The warmest days came on the 8th-11th and, in northern areas, on the 1st. The highest reading was 82 at Batterflats, Stirling on the 11th. The warmest nights, with minima between 50 and 55, were the 12th-16th. In general, the coldest nights were the 3rd-5th and periods around the 15th and 20th, the lowest minimum being 31°F. at Glenmore Lodge on the 3rd. On the ground, temperature fell to 24 (8 degrees of frost) near Cannich (Inverness-shire) on the 3rd and 4th.

Sunshine amounts exceeded average in the West and North-west but the East Coast was extremely dull, there being deficits of 30-60 hours. At North Berwick it was the dullest June since 1923. The best records came from Benbecula (234 hours) and Tiree (230).

There was a moderate to large excess in rainfall in Central and East Scotland and a small shortage in most Western areas but less than half the average in the North-west. In the East, it was the wettest June in places since 1948, in contrast to North Skye's driest one since 1934. Little or no rain fell in the first ten days, but it was mostly wet thereafter. On the 26th, 2·11 inches fell in 24 hours at Dallas Lodge (Moray) on the 26th.

Winds were strong at times and reached gale force locally on 5 days. Thunder occurred on 15 days, morning fog on 18 days and wintry showers on 2 days.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at Eleven of the Principal Towns during the Quarter ended 30*th June*, 1963

	Abstract of Meteorological observations made at eleven of the Principal Towns during the quarter	27

EXPLANATORY NOTES

Birth-, death-, and marriage-rates are calculated on the estimated population at 31st December, 1962.

References to average or average rate are to the average rates for the corresponding quarters of the five years 1958-1962.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth-rate is above that for the third quarter of 1962 and is also above the average.

The stillbirth-rate is below the average.

The marriage-rate is above that for the corresponding quarter of 1962, but is below the average.

The death-rate is above that for the third quarter of 1962 and is above the average.

The infant mortality rate is the lowest ever recorded for any quarter.

Live Births. 25,662 births were registered in the quarter under review, 289 more than in the corresponding quarter of 1962. The rate per 1,000 population is 19·6, being 0·2 above that in the third quarter of 1962 and 0·7 above the average.

The proportion of illegitimate births, 5·4 per cent, is 0·5 above that for the third quarter of 1962 and 1·0 above the average.

Of the 25,662 births 13,018 were of male children and 12,644 of female children, being 1,030 male births per 1,000 females. Births registered in July numbered 8,956, in August 8,730 and in September 7,976, the equivalent birth-rates being 20·3, 19·8 and 18·6 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 486 and is equivalent to a rate of 19 per 1,000 total births (including stillbirths). The rate is 1 below that for the corresponding quarter of 1962 and 3 below the average.

Marriages. The number of marriages registered, 12,050, is 78 more than in the third quarter of 1962. The rate per 1,000 population is 9·2. It is 0·1 above that for the corresponding quarter of 1962 but 0·1 below the average.

Of the 12,050 marriages 2,253 were civil marriages contracted in Registrars' Offices, 9,796 were solemnised by a Minister of Religion, and one was registered on the authority of the Court of Session. In the corresponding quarter of 1962 civil marriages numbered 2,204 and those with a religious ceremony 9,768.

Marriages registered in July numbered 4,206, in August 3,302 and in September 4,542, the equivalent marriage-rates being 9·5, 7·5 and 10·6 respectively.

Deaths. Deaths registered during the quarter numbered 13,773, and equal a death-rate of 10·5 per 1,000 population. They are 313 more than were registered in the corresponding quarter of 1962. The rate is 0·2 above the rate in that quarter and 0·4 above the average.

Deaths registered in July numbered 5,029, in August 4,326 and in September 4,418, the equivalent death-rates being 11·4, 9·8 and 10·3 respectively.

Infant Mortality. Deaths of children under one year numbered 549 and are equivalent to an infant mortality rate of 21 per 1,000 registered live births. This rate is 3 below that for the corresponding quarter of the previous year and 3 below the average. Among legitimate children the mortality was 21 per 1,000 births and among illegitimate children 25.

The neonatal mortality rate (deaths of infants under 28 days) was 15 per 1,000 live births, and is 3 below that for the corresponding quarter of 1962.

Perinatal deaths (stillbirths and infants under 7 days) numbered 827, and are equivalent to a rate of 32 per 1,000 total births (including stillbirths). This rate is 3 below that for the third quarter of 1962.

Sickness Benefit. The number of new claims to sickness benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 24th September, 1963, was 203,767, of which 58,718 were in Glasgow, 15,116 in Edinburgh, 8,131 in Dundee and 6,686 in Aberdeen.

ESTIMATED POPULATION, TOTAL, CIVILIAN AND DE FACTO, BY SEX AND AGE AS AT 30th JUNE, 1963

Total population comprises the civilian population, all members of H.M. Forces of Scottish domicile and Merchant Navy at home and abroad, but excludes Forces stationed in Scotland who are not of Scottish domicile.

Civilian population comprises all civilians but excludes Merchant Navy at home and abroad.

De Facto population comprises the population, of all types, actually in Scotland.

(*Figures in Thousands*)

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

JULY 1963

The mean temperature was 56·6°F., 2·3°F. below average. The warmest days occurred in most places during the last four days of the month and the highest reading was 84°F. at Gordon Castle on 30th, while Elgin and Kinlochewe both reported 82°F. on the same date. The warmest night temperature was 61°F. measured at Cape Wrath, Poolewe and Duntuilm, overnight 29th/30th. The coldest nights occurred around 10th-13th, 17th-18th, 21st and 25th-27th with the lowest minimum recorded as 35°F. at Bargrennan (13th), Balmoral (18th) and Buddon Ness and Dundeugh on 27th. On the ground, temperature fell to 28°F. (4 degrees of ground frost) at Benbecula on 11th, Bargrennan on 13th and Auchterhouse on 25th.

Sunshine totals were below average only in areas near the South Moray Firth and in Eastern districts. Stornoway (180 hours) had an excess of 52 hours and Lerwick (174 hours) an excess of 49 hours. St. Andrews however (155 hours) recorded 22 hours less than average. Tiree was the sunniest place with 222 hours.

There was a moderate to large deficit of rainfall in most Eastern Districts and a smaller deficit in the West. Some areas in Central and Southwest however, had amounts about the average. A dry spell during the period 26th-31st was general but the 23rd was a very wet day in most areas and particularly so in the West. The heaviest daily fall reported was 1·86 inches measured at Comrie on 2nd.

Gales were reported on 4 days, morning fog on 17 days and thunder on 13 days. Wintry showers occurred on 3 days.

AUGUST 1963

The mean temperature was 55·9°F., 2·4°F. below average, and the warmest period occurred at the very beginning of the month. On both the 1st and 2nd temperature rose to 78°F. at Dundee (Mylnefield), which was the highest of the month, and overnight 1st/2nd it only fell to 62°F. at Paisley and Glasgow (Crossmyloof). The coldest spells occurred during the middle and at the end of the month and during the latter period the lowest night temperature of 29°F. (3 degrees of air frost) was reported from Balmoral, overnight 28th/29th. Day temperature only rose to 46°F. at Lowther Hill on the 20th. On the ground the lowest temperature recorded was 26°F. at Cannich and Balmoral overnight 28th/29th.

In Shetland alone, did sunshine totals almost reach the average, while in most other areas large deficits were recorded. At Fortrose the total of 67 hours was the lowest for any August since records began in 1910; Gordon Castle, with 81 hours, lowest since 1912 and St. Andrews, with 92 hours, lowest since at least 1913. Hamnavoe in Shetland was the sunniest place in Scotland with 134 hours.

Western districts, north of the Firth of Clyde, and Shetland had rainfall amounts less than average. Elsewhere there were excesses. In the East rainfall totals were mainly about one and a half times their average for August and in some places more than twice. At Duns Castle 2·34 inches was recorded on 16th and a similar amount fell at Buckie on the 19th. Gordon Castle (7·45 inches) recorded its wettest August since at least 1866 and Montrose (6·37 inches) since 1877.

Gales were reported on 5 days, morning fog on 15 days and thunder on 11 days. Auroral displays were seen in Shetland on 4 nights.

SEPTEMBER 1963

The mean temperature of 53·7°F. was 0·8°F. below average. The warmest periods were at the very beginning and in the middle of the month and the highest temperature reading was 72°F. at Banff on 16th and at Gordon Castle on 16th and 22nd. The warmest nights were around the 16th, 21st and 23rd and the highest minimum temperature recorded was 58°F. at Haddington on 16th, Forres on 17th, Poolewe on 21st and Isle of Rhum on 23rd. The coldest nights were around 10th-12th, 17th-19th and 25th with the lowest minimum recorded, 26°F. (6 degrees of frost) at Cannich on 19th. On the 29th, day temperature only rose to 44°F. at Lerwick. The lowest temperature reported over grass was 18° (14 degrees of frost), at Cannich on 19th.

Sunshine amounts were below average at places in North and Northwest but there were excesses elsewhere. North Berwick with 172 hours reported an excess of 50 hours, Dunbar with 188 an excess of 49 hours and Dumfries with 152 an excess of 41 hours over average. It was the sunniest September at North Berwick since at least 1922 and at Glasgow (Springburn Park) since at least 1914.

Rainfall in parts of Ayrshire was about half the normal September amount. At most other places totals were about average but in extreme S.E. of Berwickshire amounts were one and a half times the average. The 18th to 22nd was a dry period in most places while the 25th was a particularly wet day generally, and at Kingairloch a fall of 2·51 inches was recorded on that date.

Gales were reported on 14 days, morning fog on 14 days and thunder on 8 days. Auroral displays were seen on 18 nights. Wintry showers occurred on 3 days. In the gale of 26th gusts of 87 knots at Lerwick, 78 knots at Kirkwall and 75 knots at Duirinish were recorded.

EXPLANATORY NOTES

Birth-, death-, and marriage-rates are calculated on the estimated population at 31st December, 1963.
References to average or average rate are to the average rates for the corresponding quarters of the five years 1958-1962.
Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

NOTE.—*In addition to the usual quarterly return of births, deaths and marriages which begins on page* 11, *this Report provides on pages* 3 *to* 10 *a short preliminary return of the main population and vital statistics for the year* 1963. *The full statistics will in due course be given in the Registrar-General's Annual Report. The figures now given are provisional but may be taken as fairly accurate.*

Preliminary Return for 1963

The population and vital statistics for the year 1963 are given in Tables IA and IIA on pages 5 to 9 of this Return. The main features of the tables are briefly indicated below.

Population. It is estimated that the population resident in Scotland at 30th June, 1963, was 5,204,500. The natural increase (excess of births over deaths) during the year ending 30th June, 1963, was 38,200 and the estimated net migration loss was 34,000, of which it is estimated 21,000 went to other parts of the United Kingdom and 13,000 abroad.

Births. There were 102,691 live births in Scotland in 1963, 1,643 less than in 1962, but still higher than in any previous year as far back as 1947. The birth rate was 19·7 per 1,000, 0·4 below the 1962 rate but 0·2 above the average. Male births numbered 52,669 and female 50,022, being equivalent to 1,053 male births per 1,000 females.

Stillbirths numbered 1,997, 125 fewer than in 1962, and the rate of 19·1 per 1,000 births (live and still) is the lowest ever recorded in Scotland.

Marriages. Marriages registered during the year numbered 39,658, 586 fewer than in 1962. The marriage rate was 7·6 per 1,000, 0·1 less than in 1962 and 0·2 below the average. Ministers of religion solemnised 31,572 marriages, 31,484 of which were preceded by proclamation of banns or by publication of notice, and 88 were authorised by Sheriff's licence in accordance with the Marriage (Scotland) Act, 1939. 8,082 marriages were contracted in the offices of Authorised Registrars and 4 were registered on the authority of the Court of Session. Civil marriages comprised 20·4 per cent of the total marriages.

Deaths. There were 65,521 deaths from all causes, 2,332 more than in 1962, and 2,720 above the average. The death-rate was 12·6 per 1,000, compared with 12·2 in 1962 and the average of 12·1. The average rate in the five years before the war (1934-1938) was 13·2.

There were 2,624 deaths of infants aged under one year, giving a rate of 25·6 per 1,000 live births, the lowest rate ever recorded in Scotland. Of these deaths 1,730 were under 4 weeks, giving a record low neonatal rate of 16·8. Perinatal deaths (stillbirths and infants under one week) numbered 3,495 and equal a rate of 33·4 per 1,000 (live and still).

Table IIA shows the total number of deaths registered in Scotland during 1963, classified by sex and cause and by age and cause.

A comparison of deaths by age-groups in 1963 and 1962 shows large increases among those aged 55 and over, the greatest increase being in age-group 65-74. The death-rate at ages under 45 was 1·9 per 1,000, the same as in 1962 and at ages 45 and over it was 32·9 compared with 31·5 in 1962.

Causes of Death. The number of deaths from the principal epidemic diseases* was 395, 211 more than in 1962, a death-rate of 8 per 100,000. The increase was due mainly to influenzal deaths which numbered 356 compared with 151 in 1962. There were 17 deaths from measles (9 in 1962), 16 from meningococcal infections (21), 5 from whooping cough (2), 1 from scarlet fever (1), none from diphtheria (0) and none from typhoid fever (0).

There were no deaths from acute poliomyelitis, compared with 4 in 1962.

Deaths from tuberculosis (all forms) showed an increase from 434 in 1962 to 495 in 1963. The death-rate was 10 per 100,000, the same as the average. 468 of the deaths were from respiratory tuberculosis, 68 more than in 1962, and the rate of 9 per 100,000 is the same as the average. Non-respiratory tuberculosis deaths decreased from 34 in 1962 to 27.

There were 11,719 cancer deaths, 243 more than in 1962, and 600 above the average. Deaths from cancer of the respiratory system accounted for 2,908 compared with 2,729 in 1962 and the average number of 2,542.

Deaths from heart diseases totalled 22,198, 535 more than in 1962. They accounted for 34 per cent. of all deaths.

There were 9,936 deaths from vascular lesions of the central nervous system, compared with 9,811 in 1962, 574 from diabetes (530 in 1962) and 503 from ulcer of stomach and duodenum (541).

Deaths from diseases of the respiratory system (other than tubercular, malignant and influenzal) numbered 6,649, compared with 5,199 in 1962. This substantial increase accounted for the largest part of the increase in the total number of deaths, an increase which was mainly in the first quarter of the year and due to the severe winter. Deaths from pneumonia (except of newborn) numbered 2,988, compared with 2,210 in 1962 and from bronchitis 3,052, compared with 2,474.

Deaths from diseases and accidents of pregnancy and childbirth fell from 42 in 1962 to 39. This represents a rate of 0·4 per 1,000 births (live and still).

Deaths from congenital malformations and diseases of early infancy numbered 2,041, 177 fewer than in 1962.

Deaths attributed to violence numbered 3,014, 42 fewer than in 1962. Of these 445 were ascribed to suicide, 741 to road transport accidents, 1,212 to accidents in the home and 616 to other forms of violence. The numbers from these causes in 1962 were 473, 683, 1,234 and 666 respectively.

Details of deaths from accidents in the home and transport accidents by sex, age and broad cause groups for the year 1963 are given in tables IIIA and IVA.

*See note on page 5.

Quarterly Return of the Births, Deaths and Marriages registered in Scotland during the Quarter ended 31st December, 1963

REPORT

Summary. The birth-rate is below that for the fourth quarter of 1962, but is the same as the average.

The stillbirth-rate is below that for the corresponding quarter in 1962 and also below the average.

The marriage-rate is the same as in the corresponding quarter of 1962 and above the average.

The death-rate is above that for the fourth quarter of 1962, and also above the average.

The infant mortality rate is above that for the corresponding quarter in 1962 and also above the average.

Live Births. 24,730 births were registered in the quarter under review, 828 less than in the corresponding quarter of 1962. The rate per 1,000 population is 18·9, being 0·6 below that in the fourth quarter of 1962 but the same as the average.

The proportion of illegitimate births, 5·2 per cent, is 0·4 above that for the fourth quarter of 1962 and 0·8 above the average.

Of the 24,730 births, 12,646 were of male children and 12,084 of female children, being 1,047 male births per 1,000 females. Births registered in October numbered 8,856, in November 7,892 and in December 7,982, the equivalent birth-rates being 20·1, 18·5 and 18·1 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 487, and is equivalent to a rate of 19 per 1,000 total births (including stillbirths). The rate is 1 below that for the corresponding quarter in 1962 and 2 below the average.

Marriages. The number of marriages registered, 10,266, is 95 more than for the fourth quarter of 1962. The rate per 1,000 population is 7·8. It is the same as that for the corresponding quarter of 1962 but 0·4 above the average.

Of the 10,266 marriages, 2,108 were civil marriages contracted in Registrars' offices, 8,156 were solemnised by a Minister of religion, and two were registered on the authority of the Court of Session. In the corresponding quarter of 1962, civil marriages numbered 2,079, those with a religious ceremony 8,091, and one was registered on the authority of the Court of Session. Marriages registered in October numbered 5,467, in November 1,967, and in December 2,832, the equivalent marriage-rates being 12·4, 4·6 and 6·4 respectively.

Deaths. Deaths registered during the quarter numbered 15,877, and equal a death-rate of 12·1 per 1,000 population. They are 157 more than were registered in the corresponding quarter of 1962. The rate is 0·1 more than in that quarter and 0·1 above the average.

Deaths registered in October numbered 4,781, in November 4,891 and in December 6,205, the equivalent death-rates being 10·8, 11·5 and 14·1 respectively.

Infant Mortality. Deaths of children under one year numbered 688 and are equivalent to an infant mortality rate of 28 per 1,000 registered live births. This rate is 2 above that for the corresponding quarter of 1962 and 1 above the average. The legitimate and illegitimate mortality rates were also 28.

The neonatal rate (deaths of infants under 28 days) was 17 per 1,000 live births, and is 1 above that for the corresponding quarter of 1962.

Perinatal deaths (stillbirths and infants under 7 days) numbered 865, and are equivalent to a rate of 34 per 1,000 total births (including stillbirths). This rate is 1 above that for the fourth quarter of 1962.

Sickness Benefit. The number of new claims to sickness benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 24th December, 1963, was 273,133 of which 73,904 were in Glasgow, 21,861 in Edinburgh, 10,642 in Dundee and 9,541 in Aberdeen.

SCOTLAND

Estimated Total Population, Mid-1963, projected to Mid-1980 by sex and age

Basis: Mid-1963 estimate of Total Population (including Scottish Armed Forces and Merchant Seamen at home and abroad, but excluding Forces stationed in Scotland who are not of Scottish domicile).

Assumptions:

Mortality: Steady decline of death-rates over the period to rather more than one-half of the rates recently experienced at ages under 45, and progressively less improvement at ages over 45.

Fertility: Births averaging 107,000 a year in the first five years and thereafter increasing to 109,000 a year by 1970, and to 113,000 a year by 1980. Male to Female ratio 1·06.

Migration: An annual net loss of 30,000 persons in the first year, decreasing gradually to 20,000 in 1968-69. (Males and females in equal numbers).

Note: These assumptions relate to mid-1963, and are subject to revision in the light of changing trends and of the effects on migration of Government policy and other factors.

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

OCTOBER 1963

The mean temperature (50°F.) was 1·1°F. above average. The warmest periods were generally around 7th/8th, 11th, 19th and 23rd-25th and the highest reading was 65°F. at Castle Douglas on 23rd and Nairn on 24th. The highest night minimum temperature was 54°F. at Rhuvaal (8th), Younger Botanic Garden (11th), West Freugh (19th), Kinloss (24th) and Glasgow (Crossmyloof) and Renfrew on 30th. The coldest nights were 7th, 14th, 22nd and 28th with the lowest temperature 23°F. at Glenlivet on 28th. On the ground temperature fell to 18°F. on 28th at Cannich.

There was a deficit of sunshine in the North and extreme West but other parts had amounts above average. At Tiree only 52 hours were recorded (a deficit of 30 hours). This was the lowest October total there, with the exception of 1957 (50 hours) since records began in 1927. On the other hand Dunbar (143 hours) with an excess of 44 hours, was the sunniest place. Dumfries (103 hours) had an excess of 19 hours.

Rainfall was about half the average over the Eastern area covering Banffshire, Aberdeenshire and coastal strip southwards to Tweed. In the North and West it was up to or above average. There was a dry period generally from 25th-27th, but in the West rain was fairly persistent during the first three weeks. The 9th was a particularly wet day in the West generally, and the 20th was also very wet in the North-West. A fall of 4·23 inches was measured at Dalness, Glenetive on 9th and another of 3·35 inches at Conaglen (Loch Linnhe) on 20th.

Gales were reported on 24 days, local morning fog on 29 days and thunder on 3 days. Snow was reported on 1 day and aurora on 17 nights.

NOVEMBER 1963

The mean temperature of 42·9°F. was 0·1°F. below average. It was warmest during the first twelve days and the coldest periods were from 15th to 20th and on 30th. The absolute maximum temperature was 59°F. reported from Balmacara on 1st, Poolewe on 1st and Palnure on 3rd and the warmest night temperature was 51°F. at Balmacara on 1st, Craighouse (Isle of Jura) on 5th and Stonehaven, Kirkcaldy and Largs on 6th. The lowest night minimum was 11°F. (21 degrees of frost) at Braemar and Glenlivet overnight 20th/21st, while on 29th temperature never rose above 30°F. (2 degrees of frost) at any time during the day at Cannich. On the ground temperature fell to 7°F. (25 degrees of frost) overnight 20th/21st.

Sunshine amounts were slightly above average only at places in the West and Northwest. The largest deficit was reported from Craibstone where 40 hours was recorded, 20 hours below average. The sunniest place was Auchterhouse with 61 hours.

Rainfall amounts were less than average only in Western districts north of Argyll. Excesses in the East were large and near the Forth amounts were over three times the November average. In Edinburgh it was the wettest November since at least 1770 as, in fact, it was since 1877, using amounts measured at the eleven principal towns. The only spells with little or no rain were 14th-16th, and 29th-30th. The 10th and 23rd were particularly wet days and the highest daily amount was 2·92 inches reported from Largs on 10th.

Gales were reported on 21 days, local morning fog on 25 days and thunder on 6 days. Snow was reported on 15 days and snow lying at 9 a.m. on 10 mornings. Aurora was seen on 7 nights.

DECEMBER 1963

The mean temperature (38·2°F.) was 1·5°F. below average, the month being less cold than the three previous Decembers. The mildest period, 27th-30th, came at the end with maxima above 50°F. in most places, the highest being 56°F. at Achnashellach and Kinlochewe on the 28th. The lowest air minimum was 11°F. (21 degrees of frost) at Glentress, near Peebles on the 20th and the lowest grass minimum 5°F. (27 degrees of frost) at Carnwath on the 20th and at Strachan, Kincardineshire, on the 22nd.

Sunshine records did not differ greatly from average, and the South and East, in a broad sense, had the highest amounts. Penwhirn, near Stranraer, headed the list with 50 hours.

The records from the main centres of population indicated that only one drier December, that of 1933, has occurred since at least 1877—particularly noteworthy as it was preceded by the wettest November since 1877. At Torr House, Kirkcudbrightshire, it was the driest December since records began in 1870, and it was Edinburgh's driest one since 1908.

Only small areas received more than half the usual December precipitation while the Southwest and some East Coast areas had less than one quarter. The greater part of the first three weeks were dry and the last one wet. On the 29th, 1·26 inches fell at Achnashellach. Moderate snowfall occurred in the Northeast around the 19th.

Gales were reported from one place or other on 19 occasions, fog at 9 a.m. on 26, thunder on 3, snow on 23, snow-lying at 9 a.m. on 14 and aurora on 12.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS
